Río claro

Instrument and starting wood

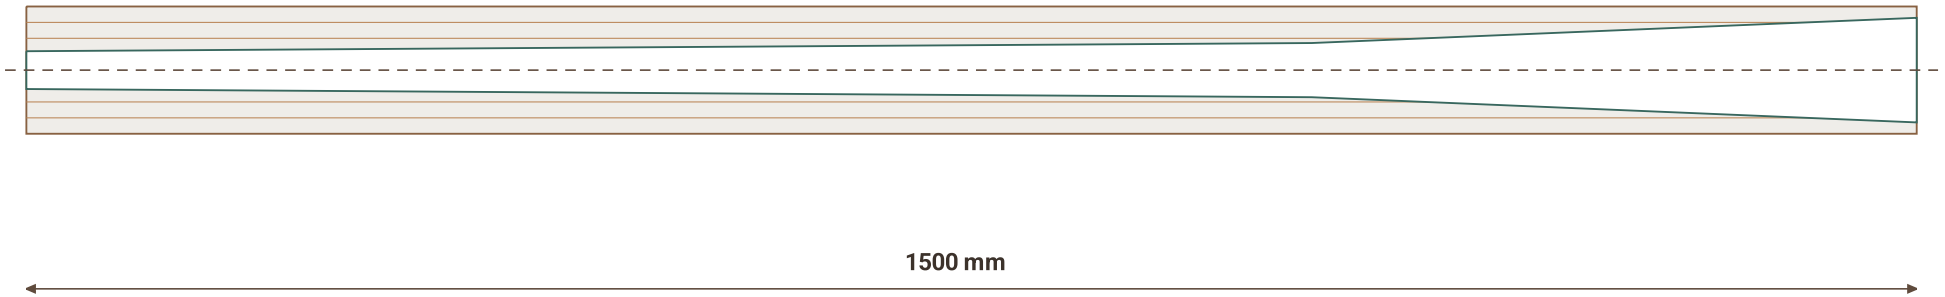

Overall assembled length: 1500 mm

Internal mouthpiece diameter: 30 mm

Internal bell diameter: 83 mm

Acoustic target: C#2 · 69.3 Hz

Starting stock · before preparation

White: final air passage · Reduced view · dimensions govern 1:6

Required envelope only · available wood unknown

Not measured yet

Required envelope only · available wood unknown

Theoretical minimum per half: width 101 mm × thickness 50.5 mm

Chosen wall constraint: 8 mm + 1 mm

Fit not confirmed

Measurements or full-length bounds are incomplete. Limiting position: 0 mm

A geometric fit is not a wood-strength or instrument-safety certification. Played pitch is not guaranteed

100 mm - print at 100% and verify with a ruler
